Dylon Fabric Dyes – Hand dyeing

**New Packs
Contain Dye
and Fix**

With Dylon you have all the colours of the rainbow to choose from. So you can wake up your wardrobe, revive a faded top or brighten up some cushion covers with colour, ease and permanent results you will be proud of!

Hand dyeing made easy with Dylon...

- You will need 250gm of household salt.
- Plastic bucket or stainless steel sink.
- One dye sachet for use in 6 litres of warm water.
- One sachet dyes up to 250gm dry fabric e.g. men's shirt to a full shade (refer colour spot), more fabric to lighter shades.
- Suitable fabrics, cotton, linen, rayon and ramie cotton. Lighter shades on cotton/polyester mixes.
- Not suitable for synthetics; pure polyesters, acrylic, nylon and fabrics with special finishes.
- Please note: colour rules apply; blue on red gives purple.
- Step by Step instructions on the back of every pack.

Hand dyeing takes 1 hour in the dye bath. The first 15mins stir and move regularly in the dye, thereafter intermittently. It's easy if you set a timer in 15min intervals then you don't forget to check and stir.
