

HOW TO | Create a custom Skateboard Deck Artwork

1. Apply Primer

Prime the surface to create a base for your design particularly if painting. This will make your design stand out more.

2. Sketch your design

Lightly sketch your design onto the primed deck using a soft pencil.

3. Paint your Design

Use acrylic paints and paint markers to fill in your design. Spray Paint is a great option for a background or for effects. Consider using brushes for larger areas and markers for details.

4. Protection and Finishing:

Fixative Spray:

Protect your finished artwork with a fixative spray designed for acrylic paints. This will help prevent damage from the elements and UV rays.

Varnish:

For a glossy or matte finish, apply a layer of acrylic varnish. Ensure it's evenly applied with a brush and allow it to dry completely

5. Dry & Hang

Make sure you allow the completed skateboard deck design to fully dry after protecting it with fixative or varnish. Once fully dry it is ready to display or hang.
